

Total Packaging Solutions Under One Roof

MRB International is a group company of Sudarshan Addpack Private Limited specially created to foray in the MENA Region. We are India's leading manufacturer of FIBC Bags & Fabrics, PP Woven Bags & Fabrics, BOPP Bags and Filler Masterbatches, serving global markets with an existing customer base in the US, Europe, Russia, Egypt, and Asia-Pacific. We are a BRC approved company for food grade packaging with all the facilities under one roof: Weaving Machines, Lamination Plant, Bag Manufacturing Facility & Additional Power Generation.

Polypropylene Bags

Laminated / Unlaminated PP / HDPE Woven Bags **With & Without Liner**

We are one of the leading Polypropylene (PP) bag manufacturer in India and exporter in the international market. Owing to long experience group can offer customers the best quality products. Our offer comprises of various types of bags and sacks. We make polypropylene woven bags and sacks according to our customer's specifications, concerning dimensions and weights. PP Woven bags are the traditional bags in packaging industry due to their wide variety of usage, flexibility and strength. Woven polypropylene bags are specialized for packing and transporting bulk commodities. Due to strength, flexibility, durability and lower cost, woven polypropylene bags are most popular products in industrial package, which are widely used in packing grain, feeds, fertilizer, seeds, powders, sugar, salt, powder, chemical in granulated form. PP Woven bags are made according to customer's preferred specifications as to mesh, denier, GSM, colour, and sizes that vary from 25 to 80 cm. widths or depending on the desired capacity.

Advantages

- ⊙ Very Affordable, Lower Cost
- ⊙ Flexible and High Strength, Persistent Durability
- ⊙ Can be printed on both sides
- ⊙ Can be stored in an open area due to UV-stability, up to 6 months
- ⊙ Water and dust proof design due to inside PE liners or laminated on the outside
- ⊙ The materials are protected from outside humidity
- ⊙ Twisted weave and anti-skid print to prevent slipping
- ⊙ Fully Recycled

Applications

- ⊙ Chemicals, Fertilizers, Cement, Minerals & Rubber
- ⊙ Flour, Grain, Seeds, Spices & Agro Products
- ⊙ Sugar & Salt
- ⊙ Sand, Metal Parts & Concrete Elements
- ⊙ Fruits & Vegetables
- ⊙ Mails / Letters / Documents

FIBC Bags

Flexible Intermediate Bulk containers (FIBC) commonly known as big bags are the most popular form of bulk goods packaging.

FIBC bags are mainly used for the transport and storage of loose materials. These flexible containers are available in a wide variety and therefore suitable for a no of applications in the food, minerals, chemical and agriculture industries.

FIBC bags are manufactured with different lifting loops, such as one, two and four as per customers request and are also available with LDPE liners to allow safe storage of highly hygroscopic goods. Bags stitches may be additionally sealed for specific material.

Advantages

- ⊙ Convenient and fast loading and unloading of large volume of goods by means of mechanized equipment
- ⊙ Fast and efficient distribution
- ⊙ FIBC bags are reusable
- ⊙ Fully Recyclable
- ⊙ Cost effective due to less transport cost and storage space
- ⊙ Easy and safe transport of goods

Raw Material

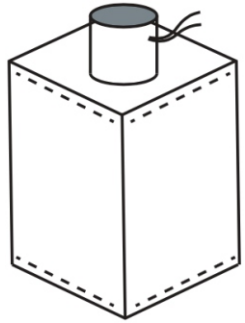

FIBC bags are made of Polypropylene fabric of different basis weights and strength parameters:

- ⊙ Coated / laminated with PP to protect goods from moisture and dust
- ⊙ Uncoated - with breathing properties
- ⊙ In the standard version FIBC bags are made of a white fabric with specified printing in different colours

BOPP Bags

Biaxially Oriented Polypropylene (BOPP)

BOPP is a polypropylene film that has been stretched in both the machine and across both directions. Available in various standard specifications, Our bags have high transparency, clarity and excellent tensile strength. These durable bags have beautiful and clear prints embossed on them. Our cost-effective BOPP pouches are best suited for food and beverage industry.

Characteristics of BOPP

- ⊙ Excellent Clarity
- ⊙ High Tensile Strength
- ⊙ Good Dimensional Stability and Flatness
- ⊙ Low Electrostatic Charge
- ⊙ Corona treatment on one or both sides
- ⊙ Waterproof
- ⊙ Reverse Printing Ability
- ⊙ High Gloss

Common Applications

- ⊙ Pet Food
- ⊙ Seed (Grasses, Bird Feed, etc.)
- ⊙ Animal Feed

Polypropylene Fabric

Polypropylene Fabrics | Circular Woven Fabrics | Coated & Uncoated **Narrow Width**

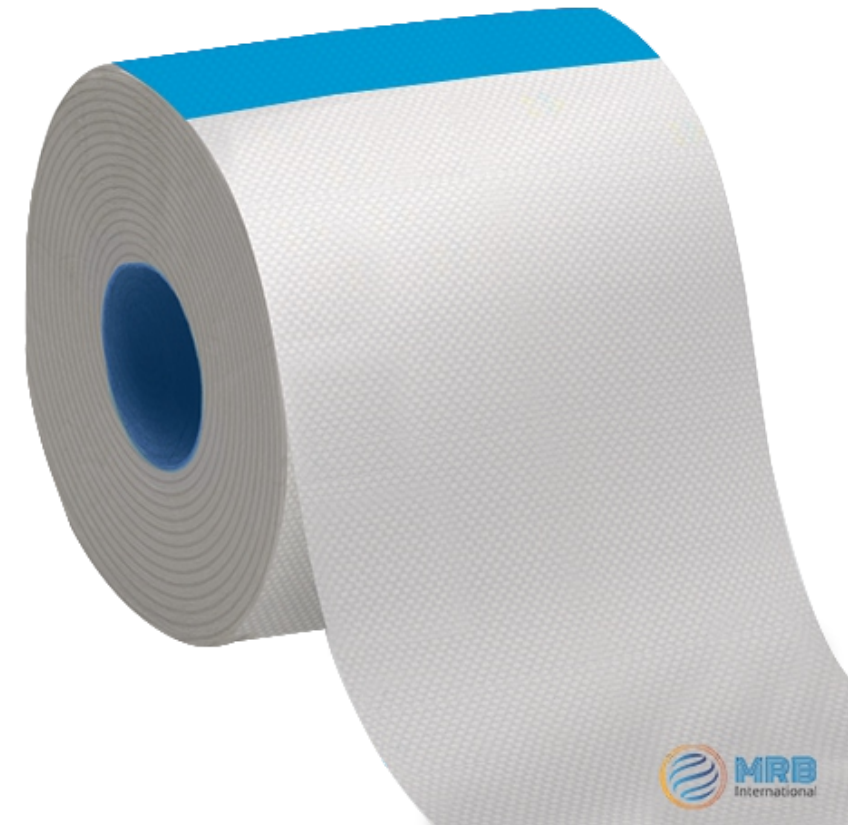

Manufacturer and supplier of Polypropylene (PP) Woven Fabrics.

Circular Fabrics are manufactured on world class circular looms and tapes are manufactured on world class tape lines.

The fabric production process is subjected to rigorous quality control procedures. Due to stringent quality checks, We offer our customers products that are superiors in technical parameters and with minimum defects (less than 1%). Polypropylene fabric consists of hydrophobic which restricts the possibility of moisture in the fabric and further, It extracts the moisture vapor away from the skin. Modern machinery and the adopted strategy of orientation on buyers' individual needs enable us to manufacture fabrics that satisfy all the requirements of our customers.

Applications

- ⊙ Polypropylene (PP) Small Bags
- ⊙ Polypropylene (PP) Box Bags
- ⊙ Polypropylene (PP) Perforated Bags
- ⊙ Flexible Intermediate Bulk Container (FIBC)

Filler Masterbatches

We incorporate best in-class technologies to produce mineral filled masterbatches with highest levels of dispersion providing both opaque and translucent solutions for various applications.

Features:

- ⊙ Consistent Product Performance
- ⊙ Nano technology for dispersing ultrafine minerals
- ⊙ Ensuring high load ability for films and Raffia applications
- ⊙ Best in class tensile strength
- ⊙ Best in class machine throughputs
- ⊙ Best in class price to performance ratio
- ⊙ Available with customization based on specific customer process applications like FDA, UV stabilised, color tones, wide range of base resins PP, PE, PS.

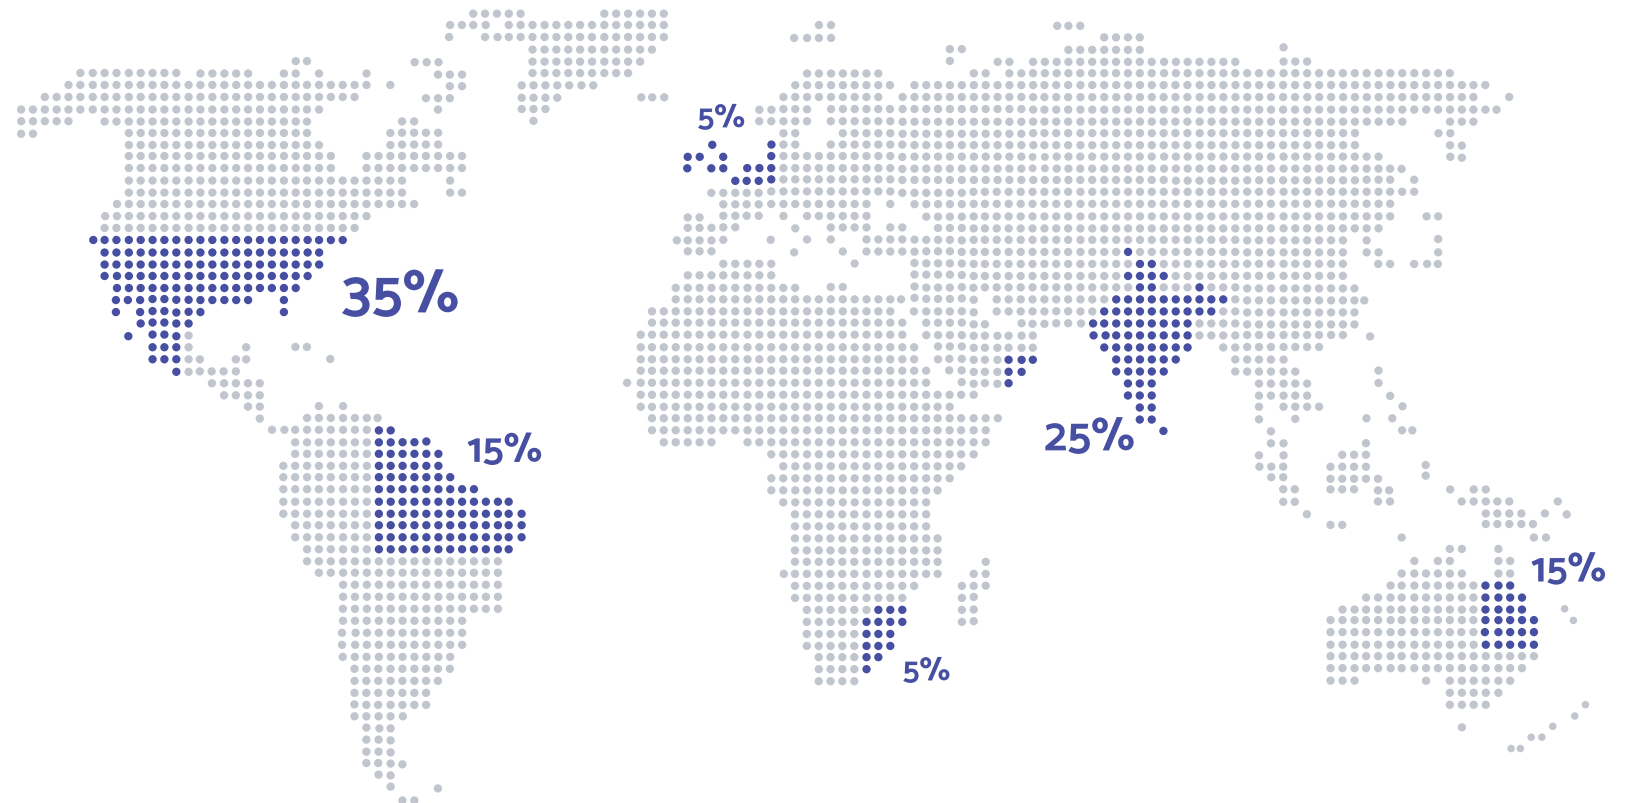

About Us

We are an India based leading manufacturer of PP/HDPE woven sacks fabrics & FIBC Bags, located in the Union Territory of Silvassa.

Global Distribution of Woven Sacks

We also have all facilities under one roof: Weaving Machines, Lamination Plant, Bag Manufacturing Capacity & Additional Power Generation.

Product Application: Chemicals & Fertilizer, Cement & Polymers, Sugar, Paper, Textiles, Flour Food Grains, Bird Feed / Dog Feed / Cat Feed / Horse Feed / Bird Seeds, Packaging of onions, potatoes garlic, groundnuts, fruits & vegetables etc.

Infrastructure

We have all the facilities under one roof:
Weaving Machines, Lamination Plant, Bag
Manufacturing Capacity & Additional Power
Generation.
